LICENSE

Thank you for trusting us and for choosing the "Invoice Without Tax (Tax excl / without VAT)" module.

The Prestashop module "Invoice Without Tax (Tax excl / without VAT)" is under the same license as all modules available on <http://addons.prestashop.com>. As a result, this module can only be used once for a single shop (except in "multistore" context).

If you want to use this module on several stores, please purchase as many licenses as you need.

INSTALLATION

REQUIREMENT

This module has been tested and works perfectly on Prestashop from version 1.5.x to version 1.7.0.5 (latest version available at the time of writing this document). It should work smoothly on all future 1.7.0.x versions.

PROCEDURE

Let say our shop is online at : <http://www.maboutique.fr/> and that the administration is accessible at : <http://www.maboutique.fr/admin/>

Prestashop offers different methods to send a module :

- From the "Modules" page of your store's administration
- From your store's directory

SEND VIA THE ADMINISTRATION

From the "Modules" tab, click on the "Add a new module" button. The following area appears :

Then click on "Choose a file" and select the archive of our module. This is the file obtained when you purchased our module. Finish by clicking the "Upload this module" button. The module is then sent to your store and appears on the list of modules available.

SEND VIA YOUR STORE'S DIRECTORY

Another way to send our module is to unzip the archive (obtained when you purchased our module) directly in the "modules" folder of your store.

The created content will be : <http://www.maboutique.fr/modules/gcinvoicewtax/>

The module then appears in the list of available modules.

INSTALLATION

"Invoice Without Tax (Tax excl / without VAT)" now appears in the list of available modules but it's not installed on your store. In order to proceed with the installation, simply click on the "Install" button.

ADDITION OF A LANGUAGE

The module is offered in a certain number of languages. If you wish to use our module in a language that is not included in the database, you can translate the labels via the interface made for this in the back office. Go to the "Translations" tab on the "Localization" tab. (For more information, see the official Prestashop documentation: <http://www.prestashop.com/en/download/>).

SETTINGS

On the "Modules" page of your back-office, clicking on the "Configure" button on the line of our module will bring up the following settings page.

The screenshot shows the configuration page for the "Invoice Without Tax (Tax excl / without VAT)" module. The page has a green header bar with the breadcrumb "MODULES > GENVOICETAX > CONFIGURE" and the title "Configure 'Invoice Without Tax (Tax excl / without VAT)' module". On the right side of the header are four icons: a circular arrow for "Back", a flag for "Translate", a refresh icon for "Check updates", and an anchor for "Manage hooks".

The main content area is titled "CONFIGURATION" and contains two settings:

- Customer Groups :** A list of checkboxes for "Customer", "Guest", "Member", "Professional" (which is checked), and "Visitor". Below this list is the text "Groups which must be billed tax excluded".
- Your country :** A dropdown menu currently showing "France". Below the dropdown is the text "Orders delivered in this country, even if from a customer who is in the specific group, will be charge by tax".

At the bottom left of the configuration area is a "Save" button with a floppy disk icon.

CONFIGURATION ZONE

- "Customer groups" : This first setting allows you to choose customer groups that must be invoiced taxes excluded. You can choose as many groups as you want.
- "Your country" : Choosing your country from the drop-down menu will allow you to continue to charge taxes for an order delivered in your country whatever the customer's group.

SUPPORT

We made this module with the utmost care but it is possible that a bug may pass through our tests. Do not hesitate to report any bugs that you may encounter, we will be happy to help you quickly and efficiently.

Also, we listen carefully to all your suggestions of features and integrate most of them in the next updates. Warning, we never integrate any specific needs.

DEMO SHOP

A demo store is at your disposal from the product sheet of our module on Addons. The front-office and back-office user accounts are specified on the home page.

This shop is regularly reset, so do not hesitate to do all your tests there.
