**Latest update** : 01/30/2018

**Demo** : <http://prestashop-modules.businessstech.fr>

[demo@demo.com](mailto:demo@demo.com)

demodemo

## Server prerequisites

Minimum PrestaShop version: **1.5**

Web Server: your server must include the following standard «\$\_SERVER» variables:

- 'HTTP\_HOST'
- 'REQUEST\_URI'

## Module installation

As for any other module, unzip the .zip file and upload the “gmerchantcenterpro” folder via FTP inside the “modules” folder on your server.

Install the module via the back-office as usual.

## Module configuration

In order to configure the module please follow our FAQ topic link:

<http://faq.businesstech.fr/faq.php?id=94&lg=en>
